About Me

Senior UX Designer with 5+ years of experience specializing in enterprise SaaS platforms, internal tools, and complex B2B systems. Expert in transforming fragmented workflows into streamlined digital experiences through user-centered design, data visualization, and design systems. Proven track record of collaborating with engineering teams and facilitating workshops to drive product strategy and simplify complexity for internal stakeholders and sellers.

Skills

UX Design/Research

Internal Tools & Dashboards

B2B/B2C/SaaS

High-Fidelity Prototyping

User Flow Mapping

Wireframing & IA

Design Systems

Data Visualization

Figma (Variables & Auto-layout)

Workshop Facilitation

Usability Testing

JTBD Frameworks

Interaction Design

Design Thinking

Stakeholder Collaboration

Cross-functional Teams

Education

Bachelors of Architceture

School of architecture, AGI, Jaipur

2016 - 2021

Experience

UX Designer

Michelin

2023-2026

- Led UX design for enterprise analytics platforms, improving efficiency by 40% for 500+ stakeholders.
- Developed design system components in Figma, ensuring consistency and reducing design-to-development time by 30%.
- Conducted user inquiries and testing to create data-rich dashboards for inventory and logistics.
- Facilitated design thinking workshops to map digital journeys and identify internal process pain points.
- Created user flows, wireframes, and prototypes in Figma, ensuring seamless implementation with engineering teams.
- Applied JTBD frameworks to streamline workflows for seller onboarding and management systems.

UX/UI Designer

Metafic

2022-2023

- Designed B2B SaaS interfaces and internal workflow tools for enterprise clients, managing the complete design lifecycle from discovery to delivery.
- Partnered with engineering teams to communicate design decisions to technical stakeholders, ensuring alignment between design vision and technical constraints.
- Built extensible dashboard designs using advanced information architecture and visual hierarchy principles to help business users interpret complex datasets.
- Improved user satisfaction by 35% through iterative usability testing and design refinements based on user feedback.

UX/UI Designer

Warpspd

2021-2022

- Designed B2B SaaS interfaces and internal workflow tools for enterprise clients, managing the complete design lifecycle from discovery to delivery.
- Partnered with engineering teams to communicate design decisions to technical stakeholders, ensuring alignment between design vision and technical constraints.
- Built extensible dashboard designs using advanced information architecture and visual hierarchy principles to help business users interpret complex datasets.
- Improved user satisfaction by 35% through iterative usability testing and design refinements based on user feedback.
